

PSA Panel ID Plates

Permanent Identification Plates for Precast Items

PSA PANEL ID PLATES

PSA Panel ID Plates are Polypropylene plates that allow for a permanent identification of precast members as required in AS 3850.

They are available in a variety of colours to allow to distinguish between projects or batches within a project. With their bright colours they can be identified from a large distance and help to locate panels in the precast yard.

The use of PSA Panel ID Plates helps precasters meet the traceability requirements of AS 3850.

They are available in 2 widths, 75mm and 100mm.

INSTALLATION

PSA Panel ID Plates can be glued to the formwork using double-sided tape, or for near-face applications can be puddled into the concrete from the top using the break-off nib provided on the top of the Panel ID Plate.

The ribbed feet on the rear of the plate provide a secure mechanical bond with the concrete.

The information is added using a permanent marker.

INFORMATION

PSA Panel ID Plates have room for the following information:

Manufacture Date / Table No. / Weight / Job No. / Panel No.
