- 16-17** Key financial results

VISION

Raise the profile and importance of 'outstanding' leadership for Australia

MISSION

Encourages Australians to reflect on leadership, build their own leadership capability and take leadership roles in the community.

PURPOSE

The Menzies Foundation supports leaders who have the capacity to make catalytic change to improve Australia's future.

Established in 1979 to perpetuate the legacy of Sir Robert Menzies, Australia's longest serving Prime Minister, the Foundation has a track record in backing outstanding leaders.

Over its first 40 years the Foundation awarded over 230 scholarships and made significant grants to support medical research. The impact of this investment is manifest in our Alumni who continue to tackle key community challenges – from mental health, cancer and autism, to global human rights issues and the climate change.

From 2018 the Foundation moved toward a more catalytic model of practice to raise the profile and importance of 'outstanding' leadership, build leadership capability and highlight the importance of service to the community.

To achieve this, the Foundation identifies strategic areas of focus and support initiatives that:

// Build collaboration platforms to harness partnership expertise and resources for impact

// Build incubators to develop innovation pipelines

// Codify the insights and disseminate the learnings with others to develop systemic interventions to scale the initiatives.

To inspire and nurture Australia's future leaders.

FROM THE CHAIR AND CEO

2020 was an exciting, all be it, challenging year for the Foundation as indeed it was for all Australians. The implications of COVID-19 are game-changing and have accelerated the importance of supporting the development of leaders who have a strong sense of purpose whilst being adaptive, comfortable in complexity and resilient.

During 2020, the Foundation continued to develop its catalytic platform, by focusing on the implementation of the programs launched in 2019 and developing a suite of new initiatives to deepen our engagement with Australian leadership challenges.

In addition to supporting science entrepreneurs, school leaders and the Australian legal system to grapple with the challenge cyber security risk and resilience, the Foundation launched initiatives to support indigenous women's entrepreneurship in the Kimberley and an Emerging Leaders program focused on assisting a global community of young people to build their ethical leadership muscle.

Another initiative arose in the context of the generous response of the Australian community to the bush fires which saw a matched grant from the Foundation and subsequent work in citizen leadership and community resilience. In addition to supporting communities to respond to natural disasters, the importance of this initiative has become increasingly apparent in a post-COVID world which has heightened the imperative of community agency in times of crisis.

All of the Foundation's work this past year affords us a unique insight into the dimensions of leadership and provides the

platform from which to make a significant contribution to the Australian leadership discourse. These insights underpin our collaboration with the Menzies Swinburne University Leadership Hackathon, the ANU 3Ai Centre Systems Engineering for Next Generation Leadership Program and the continued development of the Menzies Leadership Forum.

The Menzies Foundation Board was further strengthened by the addition of Frances Maguire and Naomi Milgrom AC who bring a wealth of experience and outstanding leadership qualities to support the work of the Foundation.

We would also like to acknowledge the positive and capable way the Foundation's staff responded to the vicissitudes presented by the pandemic and thank them for their outstanding contribution over this time.

In closing, we would like to express our gratitude to the outstanding collective of collaborators who have joined us in the important work of raising the profile and importance of 'outstanding' leadership. We are indebted to them for their wisdom and insight and the tenacity they bring to supporting our considerable ambition to innovatively address systemic Australian leadership challenges and support in the spirit of Sir Robert Menzies, the development of the next generation of Australian leaders.

Peter Jopling
AM QC Chair

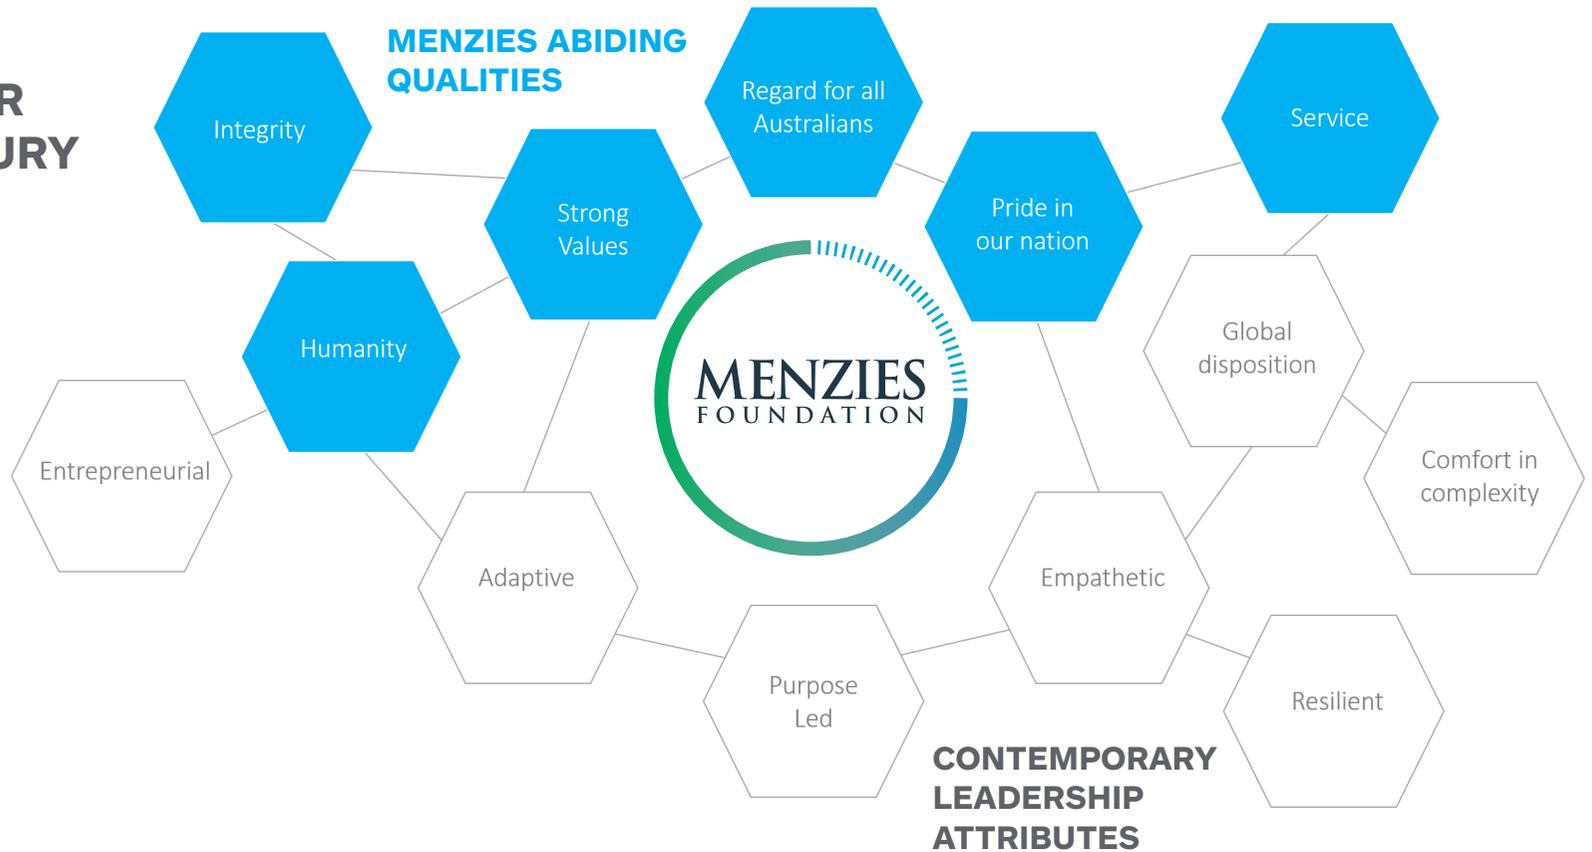

Liz Gillies
CEO

OUR FOCUS

- // Build on the legacy of Sir Robert Menzies
- // Develop a contemporary understanding of 'outstanding leadership'
- // Encourage Australians to reflect on leadership, build their own leadership capability and contribute to the community.

AUSTRALIAN LEADERSHIP FOR THE 21ST CENTURY

STRATEGY AND DIRECTION

The Menzies Foundation aspires to support leaders and leadership initiatives with the capacity to make catalytic changes to improve Australia's future.

Our areas of focus are:

- // THE LEADERSHIP DISCOURSE
- // ENTREPRENEURSHIP IN SCIENCE
- // LEADERSHIP IN OUR SCHOOLS
- // GLOBAL LAW CHALLENGES WITH A FOCUS ON CYBER SECURITY, RISK AND RESILIENCE
- // INDIGENOUS WOMEN ENTREPRENEURSHIP
- // EMERGING LEADERS
- // CITIZEN LEADERSHIP AND COMMUNITY RESILIENCE

[Learn more](#)

MENZIES LEADERSHIP DISCOURSE

Leadership is often a topic of contention. As we strive to raise the profile and importance of 'outstanding' leadership for Australia, we aspire to contribute to this conversation, garnering insights from contemporary leaders to inform this debate.

UNIVERSITY OF MELBOURNE MENZIES ORATION

The Menzies Foundation has had a long association with the University of Melbourne.

The 2020 Oration was presented by Dr Tina Seelig, a world-renowned Stanford University Professor, speaker and best-selling author on innovation, entrepreneurship and creativity. The Oration was delivered on 7 October, virtually via zoom and can be [viewed here](#).

Dr Seelig, drew on insights from a workshop with a group of Australia's next generation entrepreneurs, during which she explored the power of 'creativity with constraints' and challenged participants to unlock their potential and creativity to innovatively pivot for a reimagined future.

[Learn more](#)

MENZIES FOUNDATION AND SWINBURNE UNIVERSITY LEADERSHIP HACKATHON

As part of our commitment to contributing to Australia's leadership discourse, the Foundation is delighted to be partnering with Swinburne University's Innovation Precinct, collaborating with Adam Jacoby, Director Global and Strategic Innovation, to host the inaugural Menzies Foundation & Swinburne University Leadership Hackathon.

On Day 1, in December 2020, over 50 leading Australians virtually connected to consider the provocation: *The Leadership that got us into this mess, can't get us out of it. What does leadership 4.0 need to look like?* and determine the future of Leadership in a Globalized, Digitized, Tribal world.

The Hackathon was comprised of a series of short, interactive and collaboration sessions which considered the current leadership landscape, key emergent leadership challenges and leadership priorities for the future of Australia and the world.

Day 2 will be held in April 2021

[Learn more](#)

SYSTEMS ENGINEERING FOR NEXT GENERATION LEADERSHIP

The Foundation is partnering with ANU Distinguished Professor Genevieve Bell, Director of the 3A Institute, to develop an intensive leadership program for an AI future.

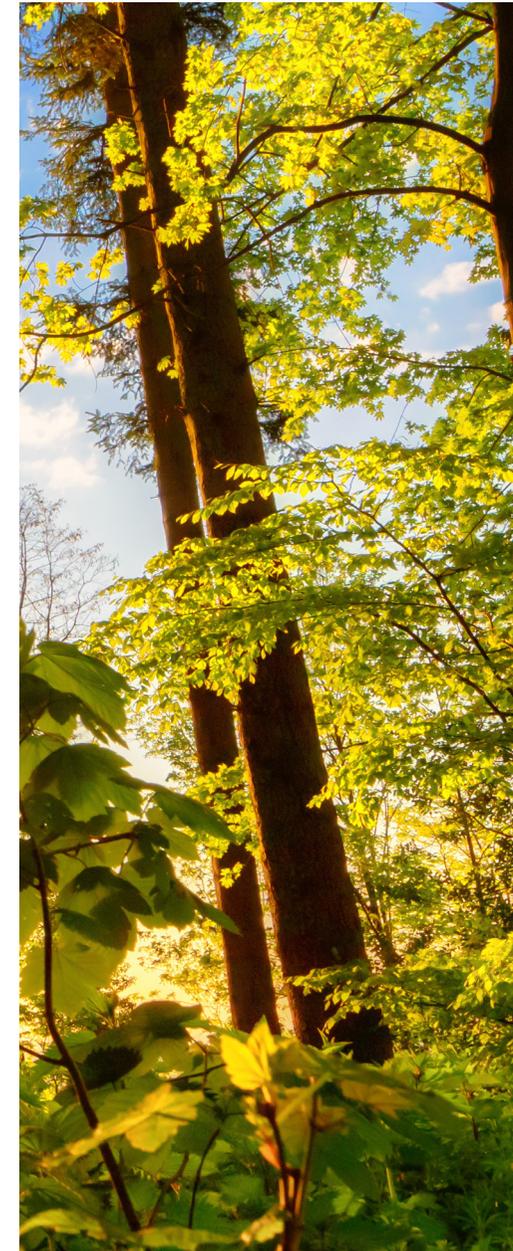

Focused on the cutting edge of understanding the skills and capabilities required for this future, the program will focus on the type of leader and leadership attributes required to lead in an increasingly connected, complex and adaptive world.

[Learn more](#)

MENZIES LEADERSHIP FORUM

This is a virtual space of rich content, showcasing leaders and the contributions they make to the leadership conversation. Over the course of 2020, multiple leaders were engaged to share their leadership perspectives and reflect on their leadership journey..

[Learn more](#)

SCHOOL LEADERSHIP

MENZIES SCHOOL LEADER FELLOWSHIP PROGRAM

Are our school leaders properly equipped? School leadership is at critical leverage point for school system improvement. The education system requires a talent pipeline of school leaders that are better prepared for the complex role of leading the improvement required to lift student performance.

Menzies Foundation was delighted to release the first Impact & Evaluation Report and ACER Background Literature Review of the Menzies School Leader Fellowship Program in 2020. The [2019 Impact and Evaluation Report](#) and [ACER Literature Review](#) provides a snapshot of our progress to date and outlines future areas of focus.

The **Menzies School Leader Fellowship Program** is an excellent example of the catalytic nature of our work, and we would like to acknowledge the collaboration team and the 2019 Menzies School Leader Fellows for their contribution to this important initiative.

As a consequence of the Covid-19 pandemic, **The Menzies School Leader Fellowship Program** went on hiatus for the majority of 2020. During this time the 2019 Fellows were provided with continued leadership support.

In September 2020, Menzies School Leader Fellow, Karen Snibson and key collaborator Angela Mina, Leadership Coach explored the topic - School Improvement: working in this way has helped me empower other learners and other leaders. [This can be viewed here.](#)

LAW PROGRAM

NINIAN STEPHEN MENZIES LAW PROGRAM

In August 2020, due to the effects of the Covid-19 pandemic, the ANU Cyber Institute closed its doors.

In response, the Foundation is delighted to announce in partnership with ANU College of Law, the **ANU Ninian Stephen Cyber Law Program** will now be delivered through the Master of Laws Program, offering three online micro-credential programs:

- **Ninian Stephen: Data Privacy and Confidentiality** - Increasing professional baseline literacy in cyber law in order to equip practitioners and policy experts with the tools and knowledge to better manage the intersection between the law, legal practice and technology.
- **Ninian Stephen: Emotional Artificial Intelligence and the Law** - Examining the legal and emotional consequences of using artificial intelligence systems in business and government. It explores emotional AI or affective computing, which is being used to develop machines that are capable of reading, interpreting, responding to, and imitating human affect.
- **Ninian Stephen: Systems Integrity, Consequences of Breach and Access to Data** - Examining business and legal consequences of data breaches and cyber attacks. Typologies and examples will provide context to the nature and risk associated with data systems in the context of breach and attack. It will explore the interaction of different legal systems and jurisdictions.

In further support of the ANU Ninian Stephen Cyber Law program, ANU College of Law and Menzies Foundation will present the Menzies Cyber Law Series in 2021.

This 3 part series explores the challenges of resolving transnational legal cyber security and risk disputes in uncertainty and complexity, amplified by the pace of technological change, with a particular focus on ASEAN.

SCIENCE ENTREPRENEURSHIP

MENZIES SCIENCE ENTREPRENEUR FELLOWSHIP PROGRAM

In partnership with the Medtech Actuator, the Foundation is incubating a ‘talent investor’ approach which supports high potential science entrepreneurs to transition from institutional contexts and navigate the ‘funding and resource cliff’ between research and the development of investable enterprises.

The key objectives of the **Medtech Actuator Menzies Science Entrepreneur Fellowship Program** are to:

- Anchor a collaborative partnership to build a great understanding of what helps and hinders Australian science start-ups and share these insights to contribute to knowledge regarding the opportunities, barriers and impediments in Australian science entrepreneurship.
- Support outstanding science entrepreneurs in the early stages of commercialisation to take their science to scale
- Improve Australia’s innovation performance by helping aspiring scientists to build their entrepreneurial competencies and collaborate with industry and the broader innovation system

Launched in September, the 2020 inaugural Medtech Actuator Menzies Science Entrepreneur Fellows were announced; **Associate Professor Jeremy Crook**, Chief Investigator for the Synthetic Biosystems theme of the ARC Centre of Excellence for Electromaterials Science, and Principal Fellow at the University of Wollongong and **Dr Chris McCarthy**, Senior Lecturer in Computer Science at Swinburne University of Technology.

In further development of this program, ten high-potential health, medical and biotechnology researchers will be selected to receive a MedTech Actuator Menzies Scholarship in 2021

SPINNING OUT: SUPPORTING SCIENCE START-UPS IN AUSTRALIA

Systems Research into Science Entrepreneurship in Australia, focusing on the lived experience of scientists aiming to commercialise their research.

At a time when pioneering US, UK and European science entrepreneurs are pandemic-proofing the world, Australia's science start-ups are floundering - with none featuring in the nation's current top 25 start-up lists.

In collaboration with Paper Giant, Menzies Foundation initiated a research project to explore how Australia's fractured approach to supporting science start-ups is stopping new discoveries reaching markets. The study, "Spinning out: supporting science start-ups in Australia", follows the experiences of scientists currently aiming to commercialise their research.

Drawn-out Intellectual Property (IP) negotiations with research institutions, coupled with unfavourable licensing terms for investors, were among key barriers identified. The "publish or perish" success measure that research institutions place on their scientists saw many potential entrepreneurs reluctant to break away from academia, fearing there would be no pathway back in, should their venture fail. The report includes a range of practical recommendations for research institutions, government and investors to help build a pipeline of successful Australian science start-ups. It also outlined the critical role of specialist start-up accelerators in driving science innovations to market.

The central point of this report is that nascent science entrepreneurs have to negotiate the funding cliff between spin out and the establishment of an investible enterprise - this is a significant disincentive and precludes many high potential science entrepreneurs from taking this step. This is a significant systemic challenge which needs to be addressed, including the exploration of new blended capital vehicles to unlock Australian science innovation.

INDIGENOUS WOMENS ENTREPRENEURSHIP

MENZIES INDIGENOUS WOMEN'S ENTREPRENEURSHIP PROGRAM

Indigenous issues continue to be one of the key leadership challenges for Australia.

In addition, there is growing international focus on the significant benefits of building platforms focused on women's economic empowerment to support women to help themselves, support their families and communities, connect to markets and access financial services.

The Foundation is delighted to be supporting a collaboration to develop the **Menzies Indigenous Women's Entrepreneurship Program**. In partnership with Good Return and Kimberley Jiyigas, this program will support indigenous women in the Kimberley. Supported by Indigenous Business Australia, the first workshop took place in August 2020 in the East Kimberley. Over 80 women connected with each other over the two days. The second workshop in the West Kimberley is scheduled to take place in April 2021.

As an additional support and to complement the initiative the Foundation is delighted to have accepted an invitation to join Swinburne University as an industry partner to support Cindy Mitchell, CEO, The Millhouse Ventures, to undertake a PhD focused on women's empowerment, entrepreneurship, and indigenous leadership.

One of the key aspects of the Foundation's catalytic approach is to ensure that each initiative is informed by research to ensure deep knowledge insights inform the work and an impact and evaluation framework which provides evaluative insights to support strategy development. Supporting the nexus between research and evaluation is an important pillar of each incubator and provides the context for innovation and the emergence of new approaches.

EMERGING LEADERS

MENZIES EMERGING LEADERS PROGRAM

The Foundation was delighted to announce the launch of the **Menzies Emerging Leaders Fellowship Program**.

In partnership with the Ethics Centre, and AIME Mentoring and IMAGINATION University, this initiative will support Australian and a global community of young people to deeply engage with ethical challenges and build leadership capability.

The collaboration will continue to explore how the artifacts and collateral developed from the project can best support the education sector to deepen this engagement in the school curriculum.

The initiative aims to use cultural probes to support young people's response to ethical issues. Based on these responses, a selected group of these young people will come together with the collaboration partners to develop the resources to support young people to have a deeper engagement with ethics and consider ways to develop the enquiry and action learning methodology to build insight and ethical capability.

CITIZEN LEADERSHIP AND COMMUNITY RESILIENCE

CITIZEN LEADERSHIP AND COMMUNITY RESILIENCE

The Foundation's commitment to supporting local communities impacted by the devastating fires of 2019/2020 and subsequently, our interest in supporting COVID impacted communities underpins our work in citizen leadership and community resilience.

In January, The Menzies Foundation Bushfire Appeal raised over \$25,000, with this contribution being matched by a grant from the Foundation.

The Foundation is delighted to be partnering with Dr Ariella Helfgott, CEO, Collaborative Futures and network member of Collaboration for Impact to review and synthesize existing research on citizen leadership, work with bush fire and coronavirus affected communities to understand the impact of citizen leadership on community resilience and then develop a set of guidelines and implementation plans for supporting these communities to better respond to crisis and disaster.

Initially focused on five communities:

- Kangaroo Island, South Australia
- Beechworth, Victoria
- Burnie, Tasmania
- East Gippsland, Victoria
- Mallacoota, Victoria

This initiative supports members of these communities to collect, record and reflect on their own stories. The power of these stories and the wisdom they contain will deepen our collective understanding of what leadership means contextually and will guide the development of approaches to support and empower these citizens leaders and their communities.

The initiative will develop a repository of resources which will be made available to other communities across Australia.

ALUMNI

ALUMNI ASSOCIATION REPORT

The Menzies Foundation has been supporting fellowships and scholarships for more than 40 years. We now have around 230 alumni across a number of different professional fields, and I have had the privilege of representing this group on the Menzies Foundation board during 2019 and 2020.

The Foundation is always keen to draw on the rich vein of experience of our alumni and so it is important to acknowledge the outstanding leaders we have supported over the last 40 years and ensure we remain relevant to this important group. During 2020, an external consultant connected with a broad sample of Menzies Foundation alumni, exploring their experiences, expectations and motivations in regard to the Foundation. We thank the Alumni group for sharing their perspectives in building a strong, relevant network of leaders in Australia and the region. As a result of this consultation, the Foundation will be launching a new Alumni Program which will commence mid 2021.

We are delighted to announce that in 2020 we welcomed new alumni from the Menzies Science Entrepreneur Program. Dr Melony Sellars, Dr Simon Gross and Dr Jinghua Fang who completed the program in partnership with CSIRO's ON accelerator.

The strange year of 2020, brought on by COVID-19 made things difficult for the Alumni group to connect in person. We look forward to restarting in-person events in 2021. As always, the Foundation and I, remain strongly committed to this key stakeholder and look forward to a new look engagement in 2021.

KEY FINANCIAL RESULTS

AUDIT AND INVESTMENT COMMITTEE REPORT

The Foundation's investment portfolio exhibited remarkable resilience in the face of extraordinary market volatility, triggered by global economic restrictions aimed at containing the COVID-19 pandemic. The robust outcome in a stressed economic environment demonstrated the benefit of applying a diversified investment framework implemented through select strategies aligned with the mission and legacy objectives of Sir Robert Menzies. In particular, the Foundation's investments into more complex and less liquid investment strategies served to stabilise portfolio returns over the past few years. The investment portfolio increased in value across the year from \$28,967,171 to \$29,500,235 despite the Foundation withdrawing \$1,250,000 over the 12-month period for grant making and other purposes.

Walsh Bay Partners, our specialist investment adviser, continued to refine the Foundation's overarching portfolio strategy by monitoring incumbent managers and implementing the redeployment of capital throughout the year. At the onset of the pandemic, Walsh Bay Partners undertook a stress-test of each manager's portfolio. This research identified an opportunity to recycle capital from an unlisted property fund into a listed counterpart with a more attractive valuation. The switch was implemented in a timely manner which worked to the portfolio's advantage.

Through the remainder of the year Walsh Bay Partners focussed on two different activities: first, to seek to take advantage of financial distress associated with the pandemic, and second, to continue implementation of the strategic diversification program. The Foundation invested in a "secondaries" fund in private equity whose strategy is to opportunistically purchase existing fund interests from motivated sellers. The Foundation also deployed capital into a niche impact investment farmland strategy incorporating sustainable farms and water entitlements in the Murray-Darling basin.

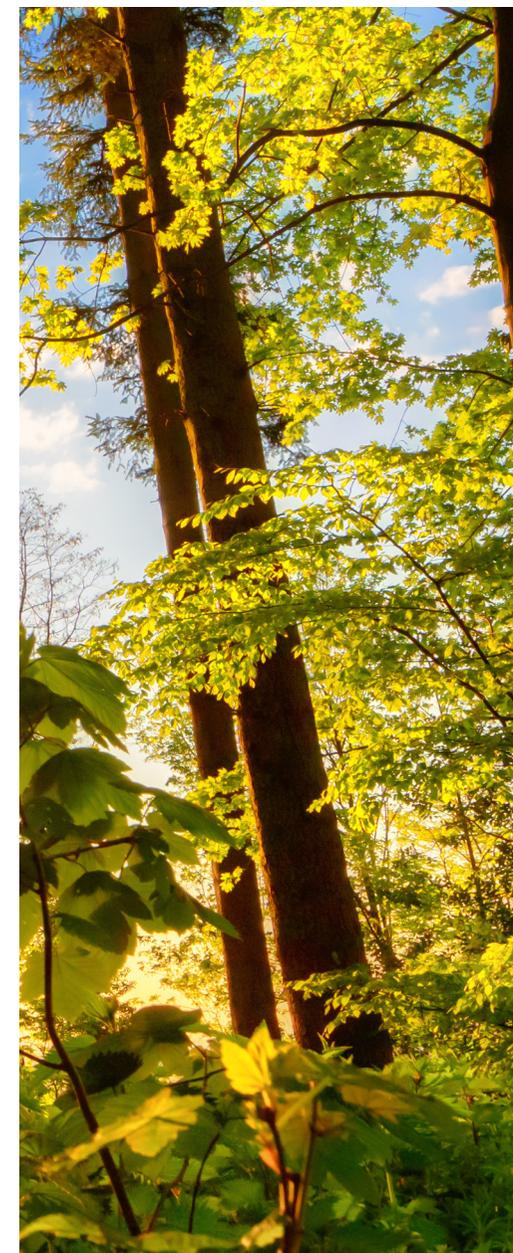

Walsh Bay Partners believes the pandemic has served to intensify the powerful structural forces transforming the global economy and accelerate disruption of business models. According to their assessment, exceptionally low interest rates, elevated prices in public markets, and a wide dispersion of business outcomes will likely remain key features of the environment. In addition, geopolitical risk and macroeconomic policy uncertainty are increasingly important factors to consider. For the Foundation to continue to meet its financial objectives, we remain focussed on strategic diversification by investing with skilful managers operating differentiated strategies.

This New Abnormal investment climate also reinforces the decision to switch to a total return investment philosophy which Walsh Bay Partners recommended back in 2017. Historically, foundations found it convenient to operate in a way that distinguished between capital and income. Over the past 30 years, however, there has been a global shift as many foundations and endowments moved away from an income focussed approach to one that embraces a total return philosophy. With this approach, investment choices are made on the basis of total prospective return (ie: the sum of income and capital growth) rather than income alone. This total return philosophy, underpinned by a resilient and disciplined investment framework, increases the potential of the Menzies Foundation achieving its growth, income and spending objectives over the long-term.

KEY FINANCIAL RESULTS

Key financial results for the year ended 31 December 2020

Income statement	2020 (\$)	2019 (\$)
Revenue from continuing operations	1,356,673	1,571,208
Expenses from continuing operations		
Menzies Health Research Centres	-	(150,000)
Scholarships and Fellowships	(1,309,850)	(595,248)
Salaries and salary on-costs	(228,233)	(212,952)
Communications and operations	(345,163)	(349,686)
Total expenses excluding gains/losses from financial assets	(1,883,246)	(1,307,886)
Operating surplus	(526,572)	263,322
Realised gain/(loss) on financial assets at fair value through profit or loss	(149,377)	92,109
Unrealised gain/(loss) on financial assets at fair value through profit or loss	598,949	(2,612,847)
Total gains from financial assets	449,572	(2,704,956)
Surplus/(deficit)/for the year	(77,000)	(2,968,278)
Total comprehensive income/(loss) for the year	(77,000)	(2,968,278)
Balance sheet		
Current assets		
Cash and cash equivalents	67,761	556,679
Trade and other receivables	109,830	78,883
Investments	29,500,235	29,153,891
Total current assets	29,677,826	29,789,453
Total assets	29,677,826	29,789,453
Total liabilities	160,501	195,129
Net assets	29,517,325	29,594,324
Total equity	29,517,325	29,594,324
