To obtain more information on the hazards of the substances consult sections 11, 12 and 16.

## SECTION 4: FIRST AID MEASURES

#### 4.1 Description of first aid measures:

The symptoms resulting from intoxication can appear after exposure, therefore, in case of doubt, seek medical attention for direct exposure to the chemical product or persistent discomfort, showing the SDS of this product. **By inhalation:** 

Remove the person affected from the area of exposure, provide with fresh air and keep at rest. In serious cases such as cardiorespiratory failure, artificial resuscitation techniques will be necessary (mouth to mouth resuscitation, cardiac massage, oxygen supply, etc.) requiring immediate medical assistance. **By skin contact:** 

Remove contaminated clothing and footwear, rinse skin or shower the person affected if appropriate with plenty of cold water and neutral soap. In serious cases see a doctor. If the product causes burns or freezing, clothing should not be removed as this could worsen the injury caused if it is stuck to the skin. If blisters form on the skin, these should never be burst as this will increase the risk of infection.

#### By eye contact:

## SECTION 4: FIRST AID MEASURES (continued)

**UBS ANTI-GRAVEL** 

This SDS is an English translation of COMMISSION REGULATION (EU) 2020/878, without any countryspecific legislation

Printina	20/12/2022	Date of compilation: 2

te of compilation: 26/06/2011

Revised: 17/11/2022

Version: 7 (Replaced 6)

Rinse eyes thoroughly with lukewarm water for at least 15 minutes. Do not allow the person affected to rub or close their eyes. If the injured person uses contact lenses, these should be removed unless they are stuck to the eyes, in which case this could cause further damage. In all cases, after cleaning, a doctor should be consulted as quickly as possible with the SDS of the product.

#### By ingestion/aspiration:

Do not induce vomiting, but if it does happen keep the head down to avoid aspiration. Keep the person affected at rest. Rinse out the mouth and throat, as they may have been affected during ingestion.

## 4.2 Most important symptoms and effects, both acute and delayed:

Acute and delayed effects are indicated in sections 2 and 11.

#### 4.3 Indication of any immediate medical attention and special treatment needed: Nonapplicable

## SECTION 5: FIREFIGHTING MEASURES

#### 5.1 Extinguishing media:

#### Suitable extinguishing media:

If possible use polyvalent powder fire extinguishers (ABC powder), alternatively use foam or carbon dioxide extinguishers (CO2).

#### Unsuitable extinguishing media:

IT IS RECOMMENDED NOT to use full jet water as an extinguishing agent.

#### 5.2 Special hazards arising from the substance or mixture:

As a result of combustion or thermal decomposition reactive sub-products are created that can become highly toxic and, consequently, can present a serious health risk.

## 5.3 Advice for firefighters:

Depending on the magnitude of the fire it may be necessary to use full protective clothing and self-contained breathing apparatus (SCBA). Minimum emergency facilities and equipment should be available (fire blankets, portable first aid kit,...) in accordance with Directive 89/654/EC. **Additional provisions:** 

Act in accordance with the Internal Emergency Plan and the Information Sheets on actions to take after an accident or other emergencies. Eliminate all sources of ignition. In case of fire, cool the storage containers and tanks for products susceptible to combustion, explosion or BLEVE as a result of high temperatures. Avoid spillage of the products used to extinguish the fire into an aqueous medium.

## SECTION 6: ACCIDENTAL RELEASE MEASURES

#### 6.1 Personal precautions, protective equipment and emergency procedures:

#### For non-emergency personnel:

Isolate leaks provided that there is no additional risk for the people performing this task. Evacuate the area and keep out those without protection. Personal protection equipment must be used against potential contact with the spilt product (See section 8).

Above all prevent the formation of any vapour-air flammable mixtures, through either ventilation or the use of an inert medium. Remove any source of ignition. Eliminate electrostatic charges by interconnecting all the conductive surfaces on which static electricity could form, and also ensuring that all surfaces are connected to the ground. **For emergency responders:** 

Wear protective equipment. Keep unprotected persons away. See section 8.

#### 6.2 Environmental precautions:

Avoid at all cost any type of spillage into an aqueous medium. Contain the product absorbed appropriately in hermetically sealed containers. Notify the relevant authority in case of exposure to the general public or the environment.

## 6.3 Methods and material for containment and cleaning up: It is

#### recommended:

Absorb the spillage using sand or inert absorbent and move it to a safe place. Do not absorb in sawdust or other combustible absorbents. For any concern related to disposal consult section 13.

6.4 Reference to other sections: See

## sections 8 and 13.

## SECTION 7: HANDLING AND STORAGE

This SDS is an English translation of COMMISSION REGULATION (EU) 2020/878, without any countryspecific legislation

## **UBS ANTI-GRAVEL**

Printing: 20/12/2022 Date of compilation: 26/06/2011	Re
--	----

levised: 17/11/2022

Version: 7 (Replaced 6)

## 7.1 Precautions for safe handling: A.-

General precautions for safe use

Comply with the current legislation concerning the prevention of industrial risks. Keep containers hermetically sealed. Control spills and residues, destroying them with safe methods (section 6). Avoid leakages from the container. Maintain order and cleanliness where dangerous products are used.

B.- Technical recommendations for the prevention of fires and explosions

Transfer in well ventilated areas, preferably through localized extraction. Fully control sources of ignition (mobile phones, sparks,...) and ventilate during cleaning operations. Avoid the existence of dangerous atmospheres inside containers, applying inertization systems where possible. Transfer at a slow speed to avoid the creation of electrostatic charges. Against the possibility of electrostatic charges: ensure a perfect equipotential connection, always use groundings, do not wear work clothes made of acrylic fibres, preferably wearing cotton clothing and conductive footwear. Comply with the essential security requirements for equipment and systems defined in Directive 2014/34/EC (ATEX 100) and with the minimum requirements for protecting the security and health of workers under the selection criteria of Directive 1999/92/EC (ATEX 137). Consult section 10 for conditions and materials that should be avoided.

C.- Technical recommendations on general occupational hygiene

PREGNANT WOMEN SHOULD NOT BE EXPOSED TO THIS PRODUCT. Transfer in designated areas that comply with the necessary safety conditions (emergency showers and eyewash stations in close proximity), using personal protection equipment, especially on the hands and face (See section 8). Limit manual transfers to small amounts only. Do not eat or drink during the process, washing hands afterwards with suitable cleaning products.

D.- Technical recommendations to prevent environmental risks

Due to the danger of this product for the environment it is recommended to use it within an area containing contamination control barriers in case of spillage, as well as having absorbent material in close proximity.

## 7.2 Conditions for safe storage, including any incompatibilities:

A.- Technical measures for storage

Minimum Temp.:	15 °C
Maximum Temp.:	25 °C
Maximum time:	12 Months

B.- General conditions for storage

Avoid sources of heat, radiation, static electricity and contact with food. For additional information see subsection 10.5

## 7.3 Specific end use(s):

Except for the instructions already specified it is not necessary to provide any special recommendation regarding the uses of this product.

## SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

## 8.1 Control parameters:

Substances whose occupational exposure limits have to be monitored in the workplace (European OEL, not country-specific legislation):

Directive (EU) 2000/39, Directive 2004/37/EC, Directive (EU) 2006/15, Directive (EU) 2009/161, Directive (EU) 2017/164, Directive (EU) 2019/1831:

## 8.2 Exposure controls:

A.- Individual protection measures, such as personal protective equipment

As a preventative measure it is recommended to use basic Personal Protective Equipment, with the corresponding <<CE marking>> in accordance with Regulation (EU) 2016/425. For more information on Personal Protective Equipment (storage, use, cleaning, maintenance, class of protection,...) consult the information leaflet provided by the manufacturer. For more information see subsection 7.1. All information contained herein is a recommendation which needs some specification from the labour risk prevention services as it is not known whether the company has additional measures at its disposal.

B.- Respiratory protection

This SDS is an English translation of COMMISSION REGULATION (EU) 2020/878, without any country-specific legislation

## **UBS ANTI-GRAVEL**

Average molecular weight: 99,79	g/mol	
TION 9: PHYSICAL AND CHEMICAL PROP	PERTIES	
Information on basic physical and chemi	cal properties:	
For complete information see the product dat	asheet.	
Appearance:		
Physical state at 20 °C:	Liquid	
Appearance:	Fluid	
Colour:	Grey	
Odour:	Acre	
Odour threshold:	Non-applicable *	
Volatility:		
Boiling point at atmospheric pressure:	109 °C	
Vapour pressure at 20 °C:	3089 Pa	
Vapour pressure at 50 °C:	12030,13 Pa (12,03 kPa)	
Evaporation rate at 20 °C:	Non-applicable *	
Product description:		
Density at 20 °C:	1110 kg/m³	
Relative density at 20 °C:	Non-applicable *	
Dynamic viscosity at 20 °C:	1,59 cP	
Kinematic viscosity at 20 °C:	950 mm²/s	
Kinematic viscosity at 40 °C:	950 mm²/s	
Concentration: Non-applicable * pH:	Non-applicable *	
Vapour density at 20 °C:	Non-applicable *	
Partition coefficient n-octanol/water 20 °C:	Non-applicable *	
Solubility in water at 20 °C: Non-applicable	e * Solubility properties: Non-	
applicable * Decomposition temperature:	Non-applicable *	
Melting point/freezing point:	Non-applicable *	
Flammability:		
Flash Point:	ca. 3 °C	
Flammability (solid, gas):	Non-applicable *	
Autoignition temperature:	300 °C	
Lower flammability limit:	1,2 % Volume	
Upper flammability limit:	7 % Volume	
Particle characteristics:		
Median equivalent diameter:	Non-applicable	
Other information:		
Information with regard to physical haz	ard classes:	
Explosive properties:	Non-applicable *	
Oxidising properties:	Non-applicable *	
Corrosive to metals:	Non-applicable *

## SECTION 11: TOXICOLOGICAL INFORMATION (continued)

This SDS is an English translation of COMMISSION REGULATION (EU) 2020/878, without any countryspecific legislation

## **UBS ANTI-GRAVEL**

	Careira conjeitu Daced en eurileble date			
Printing: 20/12/2022	Date of compilation: 26/06/2011	Revised: 17/11/2022	Version: 7 (Replaced 6)	

- Carcinogenicity: Based on available data, the classification criteria are not met. However, it contains substances classifiedas dangerous with carcinogenic effects. For more information see section 3. IARC: Toluene (3); Xylene (3); Naphtha (petroleum), hydrotreated light, < 0.1 % EC 200-753-7 (3); Titanium dioxide

IARC: Toluene (3); Xylene (3); Naphtha (petroleum), hydrotreated light, < 0.1 % EC 200-753-7 (3); Titanium dioxide (aerodynamic diameter  $\leq$  10 µm) (2B)

- Mutagenicity: Based on available data, the classification criteria are not met, as it does not contain substances classified ashazardous for this effect. For more information see section 3.

Reproductive toxicity: Suspected of damaging the unborn child.E- Sensitizing effects:

- Respiratory: Based on available data, the classification criteria are not met, as it does not contain substances classified ashazardous with sensitising effects. For more information see section 3.

- Skin: Prolonged contact with the skin can result in episodes of allergic contact dermatitis.F- Specific target organ toxicity (STOT) - single exposure:

Exposure in high concentration can interfere with the central nervous system causing headache, dizziness, vertigo, nausea, vomiting, confusion, and in serious cases, loss of consciousness. G- Specific target organ toxicity (STOT)-repeated exposure:

- Specific target organ toxicity (STOT)-repeated exposure: Exposure in high concentration can interfere with the centralnervous system causing headache, dizziness, vertigo, nausea, vomiting, confusion, and in serious cases, loss of consciousness.

- Skin: Based on available data, the classification criteria are not met, as it does not contain substances classified ashazardous for this effect. For more information see section 3. H- Aspiration hazard:

Based on available data, the classification criteria are not met. However, it does contain substances classified as hazardous for this effect. For more information see section 3. **Other information**:

CAS 13463-67-7 Titanium dioxide (aerodynamic diameter  $\leq$  10 µm): The classification as a carcinogen by inhalation applies only to mixtures in powder form containing 1 % or more of titanium dioxide which is in the form of or incorporated in particles with aerodynamic diameter  $\leq$  10 µm

#### Specific toxicology information on the substances:

Identification	A	cu e toxicity	Genus	
Toluene	LD50 oral	5580 mg/kg	Rat	
CAS: 108-88-3	LD50 dermal	12124 mg/kg	Rat	
EC: 203-625-9	LC50 inhalation	28,1 mg/L (4 h)	Rat	
Xylene	LD50 oral	2100 mg/kg	Rat	
CAS: 1330-20-7	LD50 dermal	1100 mg/kg	Rat	
EC: 215-535-7	LC50 inhalation	11 mg/L (ATEi)		
Rosin	LD50 oral	4100 mg/kg	Rat	
CAS: 8050-09-7 EC: 232-475-7	LD50 dermal	>2000 mg/kg		
	LC50 inhalation	>5 mg/L		
Naphtha (petroleum), hydrotreated light, < 0.1 % EC 200-753-7 CAS: 64742-49-0	LD50 oral	>2000 mg/kg		
CAS: 64/42-49-0	LD50 dermal	>2000 mg/kg		
	LC50 inhalation	>20 mg/L		
EC: 265-151-9	LD50 oral	10000 mg/kg	Rat	
Titanium dioxide (aerodynamic diameter ≤ 10 μm)	LD50 dermal	10000 mg/kg	Rabbit	
CAS: 13463-67-7	LC50 inhalation	>5 mg/L		
EC: 236-675-5				

#### Acute Toxicity Estimate (ATE mix):

	ATE mix	Ingredient(s) of unknown toxicity
Oral	>2000 mg/kg (Calculation method)	Non-applicable
Dermal	11000 mg/kg (Calculation method)	0 %
Inhalation	110 mg/L (4 h) (Calculation method)	0 %

## **11.2 Information on other hazards:**

#### Endocrine disrupting properties

Endocrine-disrupting properties: The product fails to meet the criteria.

Substances included in Annex XIV of REACH ("Authorisation List") and sunset date: Non-applicable

Regulation (EC) No 1005/2009, about substances that deplete the ozone layer: Non-applicable

Article 95, REGULATION (EU) No 528/2012: Non-applicable

REGULATION (EU) No 649/2012, in relation to the import and export of hazardous chemical products: Non-applicable **Seveso III**:

Section	Description	Lower-tier requirements	Upper-tier requirements
P5c	FLAMMABLE LIQUIDS	5000	50000

Limitations to commercialisation and the use of certain dangerous substances and mixtures (Annex XVII REACH, etc ....):

Contains more than 0.1 % of Toluene by weight. Shall not be placed on the market, or used, as a substance or in mixtures in a concentration equal to or greater than 0,1 % by weight where the substance or mixture is used in adhesives or spray paints intended for supply to the general public. Shall not be used in:

-ornamental articles intended to produce light or colour effects by means of different phases, for example in ornamental lamps and ashtrays,

-tricks and jokes,

-games for one or more participants, or any article intended to be used as such, even with ornamental aspects.

Specific provisions in terms of protecting people or the environment:

## SECTION 15: REGULATORY INFORMATION (continued)

It is recommended to use the information included in this safety data sheet as a basis for conducting workplace-specific risk assessments in order to establish the necessary risk prevention measures for the handling, use, storage and disposal of this product.

## Other legislation:

The product could be affected by sectorial legislation

## 15.2 Chemical safety assessment:

The supplier has not carried out evaluation of chemical safety.
