A team of dedicated professionals who can help you manage and optimise your cloud usage.

Business Continuity Assessment

How well would your business cope with a disaster?
How hard would you be impacted?

A cyberattack, natural disaster, or infrastructure failure, downtime can have severe consequences for your business.

However, if you are proactive and prepared, you can minimise downtime and reduce the impact on productivity and revenue.

A Fitzroy IT Business Continuity Assessment will examine what you've got in place and how effective it will be in the event of disaster. We can then make recommendations to ensure your plans are comprehensive and complete, and that your company is ready for anything that may eventuate.

Disasters can happen. Make sure you are ready with a Fitzroy IT Business Continuity Assessment.

What is provided with an assessment?

1. A review of your Disaster Recovery Plan
2. A review of your Cyber Incident Response Plan
3. An examination of your backup strategies
4. An examination of your data protection policies
5. An examination of any redundant systems and failover processes
6. Assessment of restoration procedures and return to operations plan

Don't have all the plans and policies in place?
We can help you develop them.

Why is disaster recovery planning so important?

There are many reasons to implement disaster recovery planning:

- **Minimise Downtime:** Quickly restore critical systems and operations to reduce productivity and revenue losses.
- **Protect Data:** Back up and secure data to prevent loss or corruption.
- **Maintain Business Continuity:** Ensure essential functions continue during and after a disaster, meeting obligations and preserving reputation.
- **Compliance Requirements:** Fulfil regulatory mandates for data protection and operational continuity.
- **Risk Management:** Identify and mitigate potential risks, reducing the likelihood and severity of disruptions.
- **Preserve Customer Trust:** Demonstrate reliability and resilience, retaining customer confidence and loyalty.
- **Mitigate Financial Losses:** Minimise revenue loss, productivity decline, and recovery expenses associated with downtime.

Having a robust plan in place also ensures that in the stress of a disaster, your staff are not improvising, but working on a proven and trusted process, towards a known outcome.

Learn from the Process

Having good people to review and manage your business continuity plans is just as important as building them right.

At Fitzroy IT we recognise this, and can assist:

Do you need ongoing help?

A Fitzroy IT Managed Service Agreement might be just what you need.

Do you have internal staff who need to be upskilled?

We can assist with training.

Peace-of-mind for your business

A disaster recovery plan is essential for:

- Protecting data
- Maintaining business continuity
- Complying with regulations
- Managing risks
- Preserving customer trust
- Mitigating financial losses

A Fitzroy IT Business Continuity Assessment ensures your organisation is prepared to navigate through unexpected challenges and emerge stronger on the other side.
