FITZROY

A team of dedicated professionals who can help you manage and optimise your cloud usage.

Security Health Check

If you use technology in your business, you know that security is critical.

The trust of your customers and your reputation depends on your ability to protect sensitive data, prevent unauthorised access and to provide reliable service, without downtime. But with threats becoming more numerous and increasingly sophisticated, how do you stay ahead of the curve? How do you know if your security standards measure up to what is required?

Enter Fitzroy IT's Security Health Check which takes stock of what you have, and makes recommendations for a more secure future.

Key Benefits of a Security Health Check

- Objective review of your company's security
- Measures your security measures against best practice
- Provides actionable recommendations for security improvements
- Conducted by a team of cybersecurity professionals
- Reduces security risks for your organisation
- Sets a baseline for managing security into the future

What do you examine during the Security Health Check?

The Fitzroy IT Security Health Check is built on compliance with AWS' Well-Architected Framework. That framework defines seven best practice areas for Security in the cloud:

- Security foundations
- Identity and access management
- Detection
- Infrastructure protection
- Data protection
- Incident response
- Application security

The Security Health Check takes the form of an interview with key personnel and also an examination of your actual infrastructure.

How else can Fitzroy IT help to secure my company?

Having good people to monitor and manage the security of your infrastructure is essential, but it may not be practical for you to employ your own cybersecurity specialist. At Fitzroy IT we recognise this, and give you many options:

- Do you need ongoing assistance to manage security? A Fitzroy IT Managed Service Agreement might be just what you need.
- Do you have internal staff who need to be upskilled? We can assist with training.

Be Safe, Be Secure

Don't lose sleep over security, get in touch with Fitzroy IT today. We're the security experts who take the time to talk to you, understand your business and give you practical advice that will give you peace-of-mind.
