

We are... **FITZROY**

A team of dedicated professionals who can help you manage and optimise your cloud usage.

WordPress: Audit Package

WordPress is one of the world's most popular Content Management Systems, and if your business relies on it, you need to ensure it's in tip-top shape.

The popularity of WordPress also makes it a target. Anyone who has administered a WordPress site knows that you must keep on top of the steady stream of WordPress, Theme and plugin updates, or else risk a critical breach. Add to this management of content changes, customer enquiries, speed optimisation, SEO and possibly eCommerce orders and running and maintaining your WordPress website can quickly become a full-time job.

And what do you do when you need to make complex changes that require PHP programmers, or the agency that setup the website for you initially? Are they still around, do they have time to help you?

With our Audit Package, Fitzroy IT can take care of all your WordPress issues and get your site running at peak efficiency.

CONTENT MANAGEMENT SYSTEM

What does the Audit Package include?

Examination and documentation of current WordPress installation, including:

- Plugins
- Themes
- Integrations
- User accounts
- Access controls (including MFA)
- Backups and Disaster Recovery Plans
- Database version
- PHP version

Security Audit looking at:

- Data security
- Password policy
- FTP Access
- Database Access
- cPanel Access (if applicable)

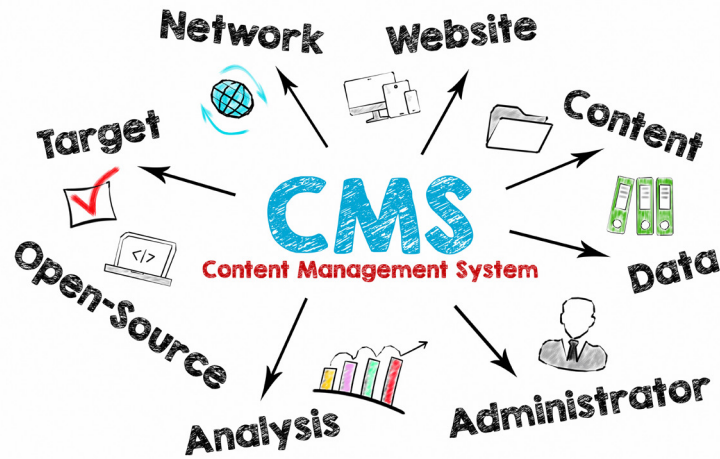

General website issues:

- Website loading speed
- SEO configuration
- Broken links
- High-availability configuration
- Test environments

At the end of the audit process, you will have documentation and a clear understanding of how your WordPress site operates, and what its current state is.

You will also be provided with a list of recommendations for **improving the security, performance and effectiveness of your WordPress website**. You can tackle these yourself, or let Fitzroy IT do the hard work for you!
