

Classic 50 Potato Oven

An economical alternative to our flagship large King Edward Potato Baker, the Classic 50 oven can be used in either counter top or back-bar situations and the resulting cost savings means this option is probably the most cost-effective baker in the entire King Edward range.

The Classic 50 potato oven is the ideal solution when you're looking for high volume without the external frills & finishing touches of the PB2FV. Available in powder coated black finish this oven is manufactured to the same exacting standards as all our other products, and meets the CE standard.

With a highly efficient fan assisted convection oven and 2600W element this oven can cook approx 50 potatoes in around an hour, plus hold a similar capacity in the illuminated top display area. With that throughput you'll be able to keep all your customers happy - and all for an astonishingly low price.

And, because this baker uses fan assisted convection cooking it means you can cook any kind of foodstuff - not just potatoes.
