AIR.Plus

Uniform baking without compromise.

Air is the medium for heat transmission and is therefore the means used to bake products. The performance of air flow is fundamental to obtain baking uniformity in all points of the single tray and in all the trays.

For this reason the air flow inside the chamber plays a leading role in the design of all **UNOX LineMiss™** ovens.

AIR.Plus technology has been designed by **UNOX** to obtain perfect distribution of the air and heat inside the baking chamber. At the end of the baking process, thanks to the **AIR.Plus** technology, the baked products have a uniform external color and their consistency remains intact for several hours. The **AIR.Plus** technology ensures perfect uniformity within every single pan, on all trays, from the top one to the bottom one.

STEAM.Plus

Humidity. Whenever you need it.

The use of humidity is increasingly widespread in the bakery and pastry processes.

The humidity introduced in the chamber during the first few minutes of the baking process of leavened products promotes the internal structure development and the goldening of the external surface of the product.

The **STEAM.Plus** technology allows the creation of instant humidity inside the oven chamber from a temperature as low as 90°C up to a high temperature of 260 °C.

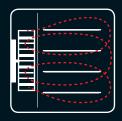

In the **LineMiss™** Dynamic ovens the release of humidity can be set with the baking program.

In the **LineMiss™** Manual Humidity the release of humidity is activated with a dedicated button.

LineMiss[™]

DRY.Plus

Texture and shape. Crunchy outside, soft inside.

The presence of humidity during the last phases of the baking of leavened products can compromise the achievement of the desired result.

DRY.Plus technology allows rapid extraction of humidity from the baking chamber, both the humidity released by the food and any possible humidity generated by **STEAM.Plus** technology in a previous baking step.

DRY.Plus technology ensures an optimal texture of the baked products: dry and well structured inside with a crisp and crumbly external surface.

Baking Essentials

Innovative and functional. Essential for your daily production.

As part of the **UNOX** research applied to the baking process particular attention has also been paid to the accessories and equipment needed to increase the versatility of the oven for everyday use.

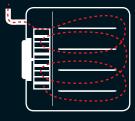

There is a **Baking Essentials** solution for each type of product: from puff pastry to sponge cake, from biscuits to cupcakes, from croissants to pizzas and leavened products.

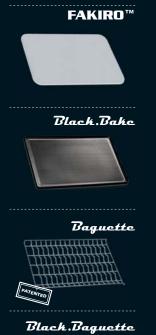

The innovative **Baking Essentials** allow the operator to deal with all types of baking, which otherwise would only be possible with the use of additional professional equipment, for example traditional pizza ovens or static pastry ovens.

Integrated technologies

TouchControl

Freedom of choice.

The **LineMiss™** line of ovens consists of 5 models: **Dynamic**, **Watic**, **Wanual Watic**, **Classic** and **Wanual Humidity**. Each model is characterized by a custom control panel and designed for quick and easy use. The **TouchControl** panels of the **Dynamic**, **Watic** and **Classic** ovens allow the operator to easily access six favourite programs previously stored. Choosing the **LineMiss™ Dynamic** and **Watic** models the operator will control oven and prover with only one panel. In addition, the **LineMiss™ Watic** ovens automatically open the door once the baking program set by the operator has finished.

COMPARATION	Pre-heating	3 baking steps	Time	Temperature	Humidity	Quick access to 6 favorite programs	99 baking programs	Additional equipment control	Automatic opening door
→ Dynamic									_
→ Matic									
→ Classic					-				
→ Manual	_	_				_	_		_

MAXI.Link

Simplicity and efficiency.

MAXI.Link technology allows the possibility of creating baking columns made up of two stacked **LineMiss™** ovens that can bake at products that require different temperature, humidity and time settings simultaneously.

MAXI.Link technology allows only the actual number of ovens necessary to manage the current workload to be turned on, minimizing power and energy consumption and the related costs.

LineMiss™ ovens with **MAXI.Link** technology combine true performance and flexibility to minimize operational costs.

Hood with steam condenser

Digitally controlled only by **Dynamic** and **Matic** ovens For models: XFT199/ XFT195/ XFT185/ XFT188 Voltage: 230 V~ IN - Frequency: 50 / 60 Hz

Electrical power: 200 W

Exhaust chimney diameter: 121 mm Min. air flow: 550 m³/h Max. air flow: 750 m³/h

Dimensions: 800x847x261 WxDxH mm **Art.: XC 595**

UNOX.Pure

The XC215 filtering system improves the water quality by significantly reducing the carbonate hardness, thus avoiding scale deposits inside the oven.

For models: XF199/ XFT197/ XFT195/ XFT193/ XFT188/ XFT185/ XFT183 RC1030A2 (3/4-JG8 JOIN) is required to connect the XC215 with the oven.

Art.: XC 215

Steam condenser

Voltage: 230 V~ IN - Frequency: 50 / 60 Hz Electrical power: 8 W - Weight: 7 kg Dimensions: 340x235x170 WxDxH mm

Art.: XC 114

Stacking kit For 600x400 mode Art.: XC 646

High open stand Capacity: 8 600x400 - Pitch: 70 mm Dimensions: 798x599x782 WxDxH mm Weight: 13 Kg Art.: XR 190

Wheels kit with safety chains For models: XLT195/ XLT193/ XR190

4 wheels complete kit:

2 wheels with brake - 2 wheels without brake Art.: XR 623

Pump kit
For models: XFT199/ XFT197/ XFT195/ XFT193/ XFT185/ XFT188/ XFT183
To connect the oven to the water tank (XC 655) in case the oven is not connected to the water supply

Voltage: 230 V~ IN.- Frequency: 50 / 60 Hz Electrical power: 16 W Art.: XC 665

Water tank for ovens with pump
For models: XFT199/ XFT197/ XFT195/ XFT193/ XFT185/ XFT188/ XFT183
Art.: XC 655

Kit for water connection of multiple ovens

For models: XFT199/ XFT197/ XFT195/ XFT193/ XFT185/ XFT188/ XFT183 Dimension: 3 m
Art.: XC 615

Kit for trays 660x460

For models: XFT199/ XFT197/ XFT195/ XFT190/ XFT193 From 600x400 to 660x460

Art.: XC 675

Kit to adapt lateral support
For all the models - From 600x400 to GN I/I
Art.: XC 630

Air reduction kit

I plate for each fan. The kit contains I plate.

Art.: XC 606

Buzzer kit

For models: XFT199/ XFT195/ XFT190/ XFT185/ XFT188/ XFT180 Increases the buzzer warning produced by the oven to inform you about the end of baking.
