

Carpet cleaning checklist

On each of our cleanings, the following is completed to our high standards.

Prior to clean

- Appraise the condition of the carpet
- Check the traffic and wear and tear of the carpet
- Locate stains and if possible, determine the cause and when created
- Discuss your expectation of the stains as some stains are impossible to remove
- Ensure the carpet has been vacuumed

Cleaning (hot water extraction method)

- Carpet is pre-sprayed with a biodegradable cleaning solution
- Carpet is rotary agitated to ensure soil separation and to help with stain removal
- Any remaining stains and spots are treated
- Carpet is steam cleaned by the hot water extraction method

After the clean

- Protect your furniture when you replace with protectors
- Ensure carpet is dry as if it is still wet colour from timbers can stain the carpet and metal legs can rust
- Open windows or use a fan to speed up the drying time

Anti-Allergy

- The special cleaning formulation is applied that changes the physical structure of pet and dust-mites
