DESIGNED AND ENGINEERED IN AUSTRALIA TO MEET AUSTRALIAN STANDARDS

## Freestanding Refrigerated

The Airex Freestanding Refrigerated Display Series has been specifically designed to display cakes and pastisseries to the highest food safety standards with its adjustable digital temperature control.

Integrating a winning combination of double-glazed heated and frameless glass construction, all Airex display cabinets provide exceptional display with minimal condensation. A uniquely designed vertical integrated low volume airflow system delivers cool air to each shelf, that reduces drying of products and extends the shelf life of merchandise. The range is equipped with reliable and robust components, including highly efficient compressors and EC fans as well as a refrigeration coil with protective coating to help prevent corrosion.

Perfectly matching the Heated and Ambient Series, these versatile refrigerated display cabinets provide hassle free cleaning with removable shelves and condenser filter and is fitted with heavy duty castors for easy maneuverability.

## Freestanding Ambient

The Airex Freestanding Ambient Display Series has been specifically designed for controlled ambient temperatures and are perfectly suited for the display of a variety of breads, pastries and cakes where temperature is not a concern, but retention of quality is.

Each unit is supplied with an adjustable digital temperature control, single glazed frameless glass construction and energy efficient LED lighting for increased product visibility and exceptional display. The range is equipped with reliable and robust components, including highly efficient compressors and EC fans as well as a refrigeration coil with protective coating to help prevent corrosion.

Perfectly matching the Refrigerated and Heated Series, these versatile Ambient display cabinets provide hassle free cleaning with removable shelves and condenser filter and is fitted with heavy duty castors for easy maneuverability.

## Countertop Displays

The Airex Countertop Display Series encompasses both Heated and Refrigerated Displays, ideal for areas where floor space is at a premium. Both models feature an adjustable digital temperature control, LED lighting, sliding doors to rear and frameless glass construction for outstanding display.

Countertop Refrigerated Displays feature double glazed heated glass to minimise condensation whilst simultaneously maintaining consistent temperature and keeping products looking fresher for longer. The display is also equipped with reliable and robust components, including highly efficient compressors and EC fans as well as a refrigeration coil with protective coating to help prevent corrosion.

The Heated Display, specifically designed to provide safe, excellent temperature control features a water pan as standard to introduce humidity into the display and is positioned for easy access and maintenance.

## Refrigerators & Freezers

Airex Undercounter Refrigerators can be supplied with either solid or glass doors while the undercounter Freezer offers solid doors. The range presents 600mm depth and 840mm height, making it ideal for compact or worktop applications. The range is equipped with an adjustable temperature control, environmentally friendly R600a Hydrocarbon refrigerant, two adjustable shelves and a protective coating on the refrigeration coil to help prevent corrosion. CFC free polyurethane insulation provides both structural support and thermal performance efficiency to reduce energy usage across the entire lineup.

Glass door refrigerators feature a lockable double-glazed heated door to provide exceptional display while minimising condensation.

Solid door refrigerators feature a lockable and reversible door to provide adaptability and ensure each unit will fit perfectly into every location.

## 1/1GN Refrigerator

Airex Undercounter 1/1GN Refrigerator Series features 2, 3 and 4 door models, each available with either solid or glass doors. Equipped with a Monoblock refrigeration system, each unit allows for improved performance through fan forced ducted cooling, ease of servicing and reliable performance. With efficiency in mind, the series provides an environmentally friendly R290 Hydrocarbon refrigerant and CFC free polyurethane insulation that provides both structural support and thermal performance to reduce energy usage.

Each Airex Undercounter unit comes standard with 1/1GN shelf configuration with adjustable runners, highly efficient compressors and EC fans, a protective coating on the refrigeration coil to help prevent corrosion, adjustable digital temperature control and energy efficient LED lighting for increased product visibility. To ensure optimum performance, filters are easily accessible and removable for regular cleaning.

Undercounter refrigerators feature self-closing, lockable doors to provide security and peace of mind. Glass door units are equipped with double glazed heated doors that provides exceptional display while minimising condensation.

# Merchandiser Series

## Upright Merchandisers

The Airex Upright Merchandiser series has been specifically crafted to provide an attractive ready-to-serve cold drink and food display. Ideal for front-of-house settings, the AXR.MEUR.1D, AXR.MEUR.2D and AXR.MEUR.3D door series excel in showcasing chilled food products. Equipped with adjustable temperature control, the frameless, ultra-clear, Low-E double glazed Argon filled glass doors and energy-efficient LED lighting provide exceptional display with minimising condensation. Featuring environmentally friendly R290 Hydrocarbon refrigerant and cyclopentane polyurethane insulation ensure energy efficiency, making this merchandiser an appealing and eco-conscious solution for your needs.

Airex establishes a new benchmark in versatile refrigerated merchandisers, featuring an electrostatic finish that helps prevent fingerprints marks and smudges. The units come with five shelves, four of which are adjustable, alongside self-closing doors, castor wheels and adjustable leveling feet. Available in 1, 2 and 3 door options, these units are provided with standard product guides and ticket stripping.
