The World's Smartest Blender

SmartBlend technology, multi-speed pulse, a 100-speed touch slider, and a sleek, show-stopping design make the Designer 725 the star of any kitchen.

Features include:

- 1800 watt motor
- Illuminated, capacitive touch interface
- Pre-programmed cycles: Smoothie, Salsa, Ice Cream, Whole Juice, Hot Soup, Clean
- 100-speed capacitive touch slider + Pulse
- Illuminated display indicates remaining blend time
- Add 10 Seconds Feature makes it easy to add 10 seconds to any blend cycle
- Metal die-cast finish
- 8 Year warranty

SmartBlend Technology

The Blendtec Designer 725 is truly the blender with a brain. Our exclusive SmartBlend technology senses and identifies potential problems that could interfere with the perfect blend-including loading errors, overheating, or air pockets - and then tells users how to fix them.

100-Speed Capacitive Touch Slider + Multi-Speed Pulse

Get seamless precision speed control for 100 speeds with the slide of a finger. It even tells you which speed to use for stirring, chopping, mixing, blending or pureeing. Use Multi-Speed Pulse for an added burst of power at any speed.

Pre-programmed Blend Cycles

Six pre-programmed custom cycles enable one-touch blending perfection: Smoothie, Salsa, Ice Cream, Whole Juice, Hot Soup and Clean. The Designer 725 even suggests additional uses for each cycle so you know how to get the most from your blender.

Tap For More

During any blend cycle, easily add 10 seconds with a single tap to the blend cycle icon you are currently using. So you can achieve the exact consistency you are looking for.
