

Zenith Club 65 E HS

Uniformity and Strength

The Eureka Zenith 65-E HS is the bigger brother of the Zenith Club-E and is clearly aimed more at medium commercial use.

The Zenith 65-E has larger burrs (65mm flats as opposed to 60mm flats), an on/off switch instead of a button, and a taller hopper with larger capacity.

The Zenith Club 65E high speed is built for performance. Its size and power make it the best in the class for the market.

Available in a multitude of colours and variants

High Speed

Grind dispersion: special engine-burrs set which optimizes the dispensing speed while preserving the proper temperature of coffee powder.

ACE System

Conceived to prevent the presence of clumps and eliminate the electrostatic charge of ground coffee.

Hands Free

All-purpose fork for "Hands-Free" operations, suited to any kind of portafilter (also naked) due to the special geometry and the adjustable support.

Barista Special

Electronics with 4 buttons for the dose preselection plus the microswitch to easily enter in "Extra Dose" mode and activate "Start Stop" function.

Transparent bean hopper

1.4kg

LCD multifunction display

Used for ease of operation

Intuitive control panel

Easy to use and function

Die-cast aluminium

The die cast aluminium cabinet makes Mignon a strong and reliable grinder.

Micrometric grinding regulation

The micrometric adjustment of grinding thickness with rotor blade axial slide enables the best possible grinding.

Operating switch

Its instant dosing (mod. on-demand) ensures the best quality and aroma.

Innovative distribution system

Eliminates any dust dispersion of grounded coffee

Adjustable channel

Adjustable outlet chute to optimize the coffee dispensing phase.
