ATTACHING MASONRY VENEERS TO POURED CONCRETE

SKU: MFA 6

This new MFA 6 backing plate is now designed with two separate sized slots, one for a L.D. Tie, that being a 2mm slot and for H.D. Ties a 4mm slot is provided

MFA 6 provides a secure means of attaching masonry veneers to poured concrete structural elements while permitting in-plane differential movements to safely occur. Available to normal or heavy duty specification. It is installed closed down for clay brick-work, open for concrete or calcium silicate masonry.

Available in Galvanised Steel Z600 or Stainless Steel
Light Duty = 1.0mm thickness, Heavy Duty = 3.0mm Thickness
Lengths: Made to Order
